SUJAL AGARWAL- https://zoro-juroo.github.io/SpectoV/

Hello,
I have made some changes in the sankalp training login page
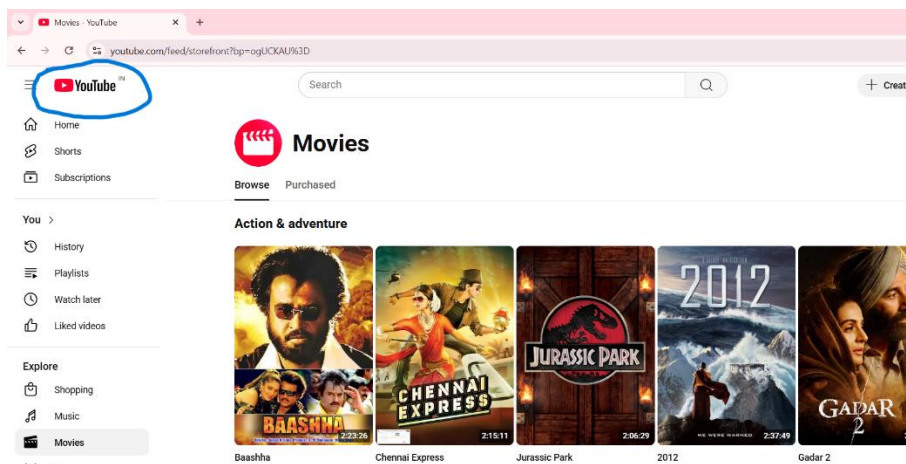

https://sankalp.spectov.in/getstarted

1. Added a clickable logo in the top-left corner that links to the homepage

why-

because all sites, like lets say youtube, udemy, etc. have this option and is a standard and effective design convention.
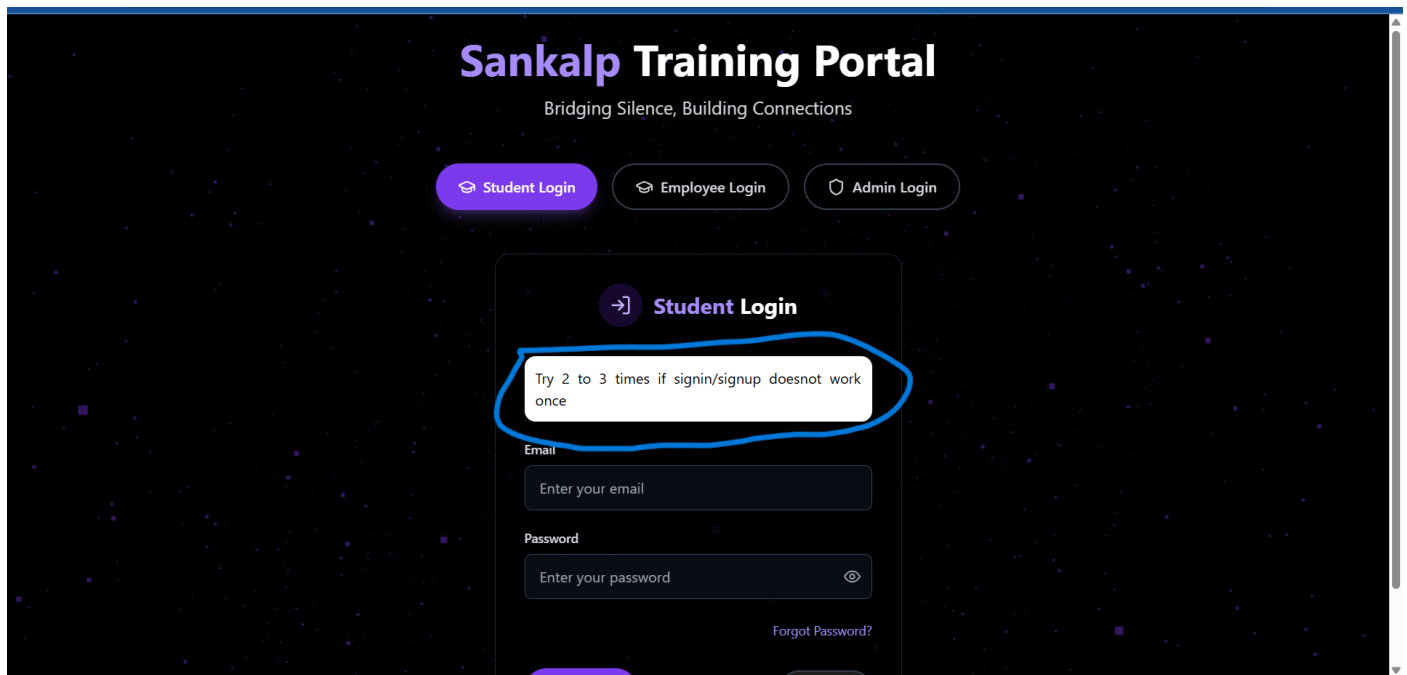

Am talking about this-

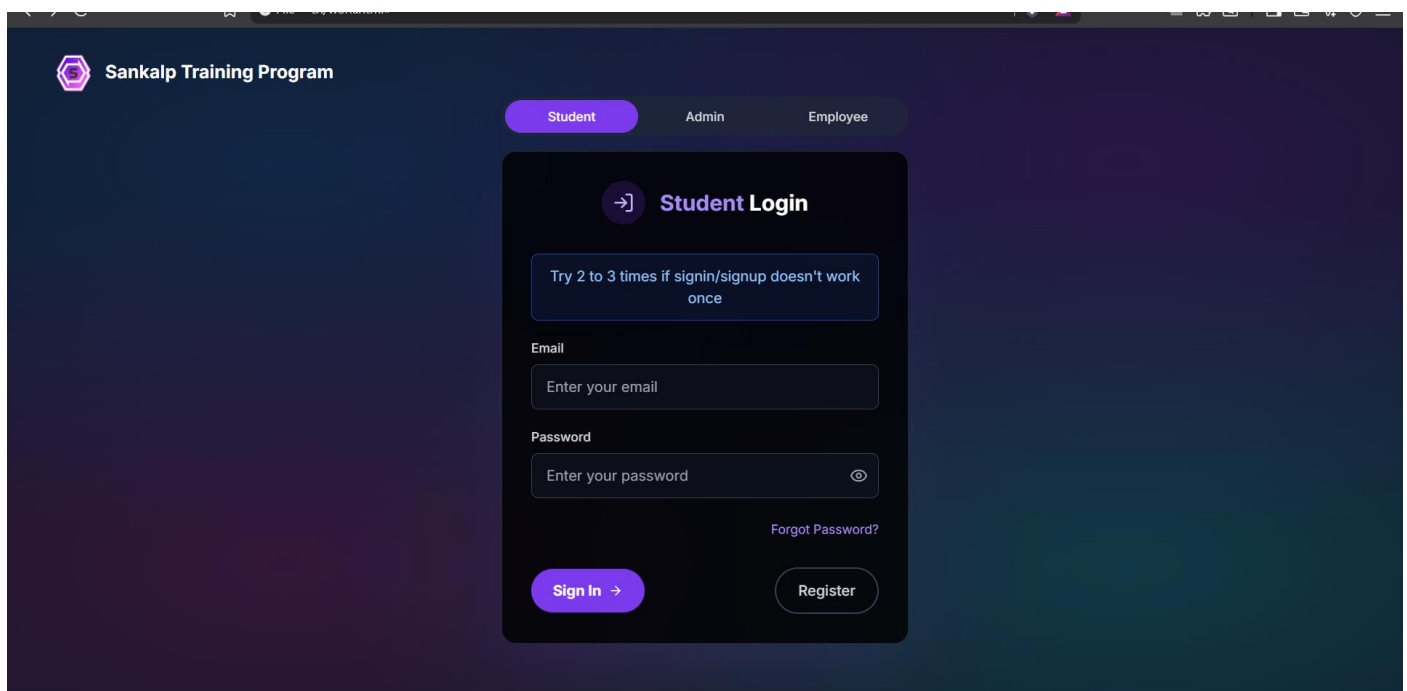

Similarly I have tried to add it.

You can also add this in the **certificates** page as I checked it is not there.

2. Missing space mistake ("doesnot") in the login page and also the color(white) and font of the div is unappealing.

I have corrected it and also changed the color and border according to the color palate.

The missing space mistake may not seem like much but as Zomato's founder Deepinder had once said in SharkTank, I also believe attention to detail is important, so I pointed it out😊 .

Thank you.
